How do I prepare for an MRI exam?

Preparing for your MRI exam is easy:

- There are no specific preparations needed. You may go about your normal activities and take your routine medications unless instructed not to by your physician.
- Please plan on arriving at least 20 minutes prior to your scheduled time to register and complete paperwork.
- Once you have arrived and checked in, you will be met by one of our trained MRI Technologists who will review your paperwork, carefully screen you for conditions that may be problematic and answer any questions you might have about your scan.
- Please tell your MRI Technologist before the MRI if you have a pacemaker, artificial heart valve, implanted drug infusion port, intrauterine device (IUD) or any pins, metallic implants, aneurysm clips, or metal fragments from previous injuries or surgeries.
- Before your scan, you may be asked to change into a gown/scrubs. No keys, coins, credit cards, dentures with metal components, hearing aids, jewelry or cell phones are allowed inside the room where the MRI scan takes place.
- Your physician may have ordered a contrast agent for certain exams to enhance the images for interpretation. If so, an intravenous line (IV) will be started in your hand or arm.

If you have any questions or you know you are running late for your exam, please call the MRI Dept. at (910) 332-1585 for assistance.

Wilmington: From I-40: continue straight down College Rd., after Hugh McRae Park, veer right onto Shipyard Blvd., go through two stoplights, office is on the right after Time Warner Cable Building.
